Measurement conditions

Keep these the same every time, so this year's reading can be compared to next year's.

Measured at	☐ Exterior vent cap ☐ Dryer outlet ☐ Other: _____
Instrument & units	[ANEMOMETER MODEL] · ☐ m/s ☐ ft/min
Dryer setting	☐ Air-only / no heat ☐ Other: _____
Vent exits through	☐ Side wall ☐ Roof ☐ Other: _____

Readings

Measurement	Before	After
Airflow reading		
Time measured		
Lint trap clean at start?	☐ Yes ☐ No	—

Work completed

- ☐ Disconnected and reconnected the dryer
- ☐ Brushed and vacuumed the reachable duct
- ☐ Cleaned the exterior vent cap
- ☐ Checked the exterior flap opens freely
- ☐ Other: _____

What we found

Recommendations

- ☐ Next cleaning: [MONTH / YEAR]
 - ☐ Replace transition duct behind the dryer
 - ☐ Other: _____
-

Compare readings only when they were taken with the same instrument, units, location and dryer setting. An airflow reading on its own does not certify a dryer or vent as safe.
